

HÖYRYLÖYLY „LÖYLYNSIELU” INSTALLATION AND USING MANUAL

INSTALLATION

ELECTRIC SAUNA HEATERS:

Take the topmost stones off from the electric sauna heater. Place the product into the heater and then cover the product's base with stones. Make sure the product is not in direct contact with the heating elements of the sauna heater.

WOOD BURNING SAUNA HEATERS:

Take the topmost stones off from the wood burning sauna heater. Place the product into the heater and then cover the product's base with stones. Make sure the product is not in direct contact with the metal body of the sauna heater.

WHEN USING THE LÖYLYNSIELU FOR THE FIRST TIME:

Heat the sauna until it reaches 60-80 degrees Celsius. Before the sauna is heated, add a small amount of water into the cup to help level the steam pressure in the product.

CLEANING AND MAINTENANCE:

If the steamer becomes clogged after frequent use, remove the wire sponge through the funnel opening with a forceps and clean it.

Warranty: The distributor warrants a 2-year warranty to repair defects caused by manufacturing defects.
